

{The proposed Environmental Policy Statement: “Draft: Wellesley College  
Environmental Policy

As an institution that prepares women to make a difference in the world, Wellesley College is committed to working towards sustainability in all relevant endeavors. Our mission of social responsibility must encompass a broad understanding of our place in the world, one that includes both our direct and indirect effects on the environment.

In accordance with this commitment, Wellesley College strives to:

- Initiate and maintain programs that lessen the negative environmental impacts of the college;
- Elevate awareness of the environmental impacts of our actions, both on the individual and collective levels;
- Use current data regarding the environmental consequences of College actions;
- Minimize consumption of natural resources;
- Aim to exceed required environmental quality standards; and
- Promote equity between economic, social, and environmental interests, in order to reflect the goals of sustainability.

We hereby affirm our duty to continually seek out efficient, clean, and sustainable practices.”}
