

WINTERSESSION 2010
MIT INDEPENDENT ACTIVITIES PERIOD (IAP) INFORMATION

The courses listed below have been previously approved by the appropriate departments at Wellesley for academic credit. Course descriptions may be found at the IAP web site at MIT: <http://student.mit.edu/iap/fctoc.html>

Please be aware of the following:

1. There is a limit of 1 unit of coursework from IAP courses during wintersession. This is a restriction that MIT imposes.
2. Registration for these courses follows the same procedure as during the academic year: a student should attend the first class to see if there is space, then obtain a cross-registration form in the Wellesley Registrar' Office and register for the course at MIT and at Wellesley (unless special registration instructions, such as a lottery, are included with the course information.)
3. Only courses that earn the equivalent of at least .5 units of credit at Wellesley (at least 6 units of MIT credit) may be considered for approval. A student may not combine 2 IAP courses to reach the .5 units of Wellesley credit.
4. If a course does not appear on this list, earns at least 6 units of MIT credit and is one that interests you, please send an email to regoffice@wellesley.edu to inquire whether it might be considered for approval.
5. The IAP period at MIT ends after the beginning of the second semester at Wellesley, so be sure to look at the class meetings times for those courses in which you are interested.

Previously Approved Courses:

Architecture

4.12A	Integrated Architecture Design Intensive Studio	1 unit
-------	---	--------

Computer Science (under Electrical Engineering and Computer Science Link)

6.091	Hands-On Introduction to EE Lab Skills	.5 units
6.190	WAMI! Web-Based Speech App. Design Comp.	.5 units
6.270	Autonomous Robot Design Competition	.5 units
6.370	The BattleCode Programming Competition	.5 units
6.470	Web Programming Competition	.5 units

Geology (under the Earth, Atmosphere and Planetary Science link)

12.213	Alternate Energy Sources	.5 units
12.310	An Introduction to Weather Forecasting	.5 units

Foreign Languages and Literature

21F.301	French I	(must continue with FREN 102)	1 unit
21F.405	Germany Today: Intensive Study of German Language and Culture		1 unit
21F.601	Italian I	(must continue with ITAS 102)	1 unit
21F.701	Spanish I	(must continue with SPAN 102)	1 unit

Literature

21L.995	Pleasures of Poetry		.5 units
---------	---------------------	--	----------

Mathematics

18.095	Mathematics Lecture Series		.5 units
--------	----------------------------	--	----------

Physics

8.20	Introduction to Special Relativity		1 unit
------	------------------------------------	--	--------

Political Science

17.911	Israel : History, Culture and Identity		.5 units
17.920	is <u>not</u> approved for credit		

Note: none of the courses in Theater Arts areas have been approved for credit.
