The primary commitment of the Counseling Service is the promotion of student psychological growth. Through counseling work with students and collaboration with the larger college community, our goal is to foster a social and academic milieu that is enriching and supportive for all students. Special emphasis is placed on multicultural awareness and training by staff and trainees who are diverse in race, ethnicity, and sexual orientation.

The services provided include individual counseling, a wide range of groups and workshops, and training and consultation to students, staff and faculty. Counseling services are made available to all students without charge.

We also provide an anonymous mental health screening tool to all Wellesley College students. Please go to the Mental Health Online Screening Program link on the Administrivia channel in the Students tab of MyWellesley to access the screening.
