Google, Harvard University, MIT, Microsoft, Stanford University, Boston Children's Hospital, Wellesley, Bank of America, Merrill Lynch
The Class of 2017 First Destination Survey measured student outcomes within 6 months of graduation, with a 71.60% response rate and an 87.63% knowledge rate. Knowledge rate data is the collection of information from NACE defined reputable sources (i.e. LinkedIn, Employers).

"The advisors in Career Education were instrumental in helping me navigate the labyrinth of academia and pointing me toward resources and opportunities that would help me achieve my goals. I will be spending the next year in Kaohsiung, Taiwan on a Fulbright Fellowship and I am so grateful to have had the support of Career Education as I figured out my first post-grad steps."

"I had four strong job offers to choose from, and I am very happy with my decision to work at iRobot. It is a wonderful job in my dream career!"

"I found it extremely helpful that Career Education organized consulting case interview preparation workshops as well as information sessions with consulting firms on campus. I can definitely say that Career Education made recruiting a much more manageable process for me, and played a role in helping me secure my current job at L.E.K. Consulting. Since recruiting season is such an important and often stressful period, I was grateful to have people like Stephanie and the others at Career Education to support me."

"I first became interested in dentistry after interning for the Global Medical Brigades on a month long service trip to Nicaragua. It was there, seeing both medicine and dentistry side by side, that I knew pre-dental was a much better fit for me than pre-medicine. Over the course of the next three years, spending hundreds of hours shadowing in different dental offices and specialties, and even taking time off to study abroad, only further solidified the feeling that I was on the right track. This fall, I will start as a D1 at the University of Pennsylvania School of Dental Medicine and hope someday to specialize in pediatrics or orthodontics."
