

Stone Center Counseling Service

Online Mental Health Screening Tool

- This free screening is anonymous and available to Wellesley College students. It is being provided so that you can learn in a private and confidential manner, whether professional support would be helpful to you.
- Each screening takes about 5 minutes to complete. At the end of each screening, you will receive an immediate result which you can print and take to a clinician at the Counseling Service or the Health Service.
- Wellesley College cannot review your individual responses and results, we do not collect names, email addresses, IP addresses or other identifying information. Only aggregate data is available.
- We want to stress that a screening is not a substitute for a complete evaluation by a mental health professional. We encourage you to contact the Counseling Services with questions and/or to schedule an appointment.
